

## Elektrische naloopschakelaar

**Flush-mounted turn-off delay timer for installation in flush-mounted boxes behind any switch**

■ Special development with ideal features for fan turn-off delay e.g. in bathrooms/WCs. The small dimensions allow installation in flush-mounted box behind any switch. Activation via on/off switch coupled with the light in windowless rooms. Individually applicable due to various period variants.

■ Interference immunity and emitted interference of switch ZNE/ZNI comply with current EN guidelines.

■ Turn-off delay timer for installation in flush-m. box behind switch

**ZNE** Ref. no. 00342

**Electronic turn-off delay timer with continuously adjustable turn-off delay periods**

Activation via on/off switch, e.g. together with light. Minimal dimensions allow almost unrestricted installation.

Contin. adjustable turn-off delay period	0–21 min.
Start-up delay, deactivatable	45 sec.
Voltage	230 V, 1~, 50/60 Hz
Load cap. min. 0.05 A max. 0.8 A (ind.)	
Protection category	IP40
Dim. mm	W 17 x H 37 x D 13
Installation	Flush box behind switch
Wiring diagram no.	477.1
– for controlling	
two rooms / switches	174.3
